

Magnetic Tube Separator

Ideal for the removal of all types of ferrous contamination from any media, including liquids and powders.

Structure: 300 Grade S/Steel with fully welded ends. Each tube has tapped holes for easy fixing and contains strong NdFeB magnets, providing high field strength for effective capture and retention of contamination. Can be supplied with Dead Ends to assist cleaning.

Maximum Temperature +120°C. (higher temperature option available upon request)

Available in two different standard diameters (D25.4 & D38.1mm) in any length.

PART NUMBER	DØ	L	Tapped
	25.4	Any	M8
	38.1	Any	M10
